NUMBER OF MODULES
21

The innovative modular solution comprised of 21 modules, expertly designed and configured to include eight classrooms, an office space, new toilets and a foundation/ prep buildings doubling as a community space. The turnkey approach ensured a hassle-free experience, with Ausco handling everything from design to transportation. Modular construction offered a practical solution for the project's location, allowing for efficient transport and on-site assembly. The \$3.8million investment in modular construction showcased the cost-effectiveness and quality of this cutting-edge approach.

The successful completion of this Education project reflects Catholic Education's commitment to providing high-quality education to rural communities. The innovative modular build sets a new standard, demonstrating the viability and potential of modular construction in the future.
